325ml SRP

325ml EGP

500ml CW

500ml ITD

450ml AWS

Bodywork

1. Clean

Bodywork Shampoo Conditioner

This PH neutral formulation gently removes traffic film and surface contaminants without stripping away any polish or wax you have previously applied.

2. Polish

Super Resin Polish

Restores gloss to dull surfaces. Light scratches, swirls, stains and scuffs vanish leaving your paintwork like new. Suitable for all types and colours of paint and simple to use.

3. Extra Gloss Protection

A durable, easy to use sealant that forms a barrier, sealing polish in and dirt out. Paintwork protected with sealants is easier to keep clean as dirt finds it harder to stick to this slippery surface.

Wheels

Instant Tyre Dressing

Dressing your tyres returns them to a natural black sheen, making older rubber look new again. This is an essential step for the perfectionist.

3. Alloy Wheel Seal

Alloy Wheel Seal is a protective coating for all types of wheel. It is easy to use and makes on going wheel care simple. Dirt is caught on the coating rather than attacking the wheel directly.
